

1080

PROPERTY BAITING RECORD BOOK

Print Property name

INTRODUCTION

1080 is a vertebrate poison classified as a Schedule 7 Dangerous Chemical and a Restricted Chemical Product under the Northern Territory (NT) *Agricultural & Veterinary Chemicals (Control of Use) Act* (section 49) and Regulations (Parts 3 and 4). It is used against pests such as wild dogs, pigs, foxes, cats and rabbits. Its use in the management of wild dogs is also controlled by the *Territory Parks and Wildlife Conservation Act* (section 57).

USE OF THE 1080 PROPERTY BAITING RECORD BOOK

The NT *Directions for Use of 1080 for Wild Dog Control* stipulates the conditions of use of 1080 on a property for managing the impacts of wild dogs on stock.

This 1080 Property Baiting Record Book is the required statutory record of 1080 use, and one book will be maintained per property.

The book must be kept at the property where baiting is to be carried out and provided to an authorised Chemical Adviser on request. It may be taken to a licensed retailer of 1080 products for entering purchase details, but returned to the property directly.

The holder of the 1080 Pest Animal Management Authorisation (PAMA and Permit) is responsible for maintaining current and accurate records of all 1080 use on each property authorised under a PAMA and Permit (from here on referred to as the Permit Holder).

The details of all people involved in the baiting activities, use, movement, handling and storage of 1080 products must be written in the 1080 Property Baiting Record Book.

This book is to be kept at the property for the term of the permit (five years), plus an additional two years after the last baiting activity authorised by the PAMA and Permit. This is a total of seven years. All associated authorisations and consignment notes must be kept for the same time.

Should the Permit Holder leave the property, the 1080 Property Baiting Record must remain with the property.

HOW TO COMPLETE THE 1080 BAITING RECORD BOOK

The PAMA and Permit

The person in charge of the property must hold a current PAMA and Permit. This authorises the holder to possess 1080 for use on property/ies specified in the permit to manage wild dog impacts.

Enter the details of this permit on **page 4** of this book.

Safe Handling

The Permit Holder must ensure that people (nominees) handling or distributing 1080 baits are properly informed and instructed on the safe handling and use of 1080 before work commences.

Enter the name of the person delivering the 1080 induction and the nominee receiving the induction on **page 4** of this book.

Only an authorised Bait Injector, a person licensed as a Pest Management Technician or an officer authorised by Parks and Wildlife Commission of the NT may use 1080 concentrate to prepare wet meat baits.

Purchasing, Collecting or Receiving 1080

A Permit Holder may collect the 1080 product from a licensed retailer or authorise a nominee or Bait Injector to collect it on their behalf. The authorisation must be in writing and a record kept of that authorisation. An example of an acceptable authorisation is on **page 3** of this book.

The Permit Holder must provide a copy of the PAMA and Permit to the licensed retailer prior to collection of 1080 products. If the Permit Holder doesn't collect the 1080 products personally, he or she must write and sign an authorisation for a nominee or Bait Injector to collect them. The authorisation is shown to the licensed retailer.

The retailer supplying the 1080 product must sign and date **page 5** of this book. The person collecting the 1080 product must also sign and date the 1080 Property Baiting Record Book on **page 5**.

Transfer of 1080 between properties or Bait Injectors

If 1080 product (including concentrate) is transferred between properties authorised on the PAMA and Permit, or between Bait Injectors, a record of the transfer is to be maintained in **page 6** of this book. Both the person handing over and the person receiving the 1080 product must sign and date the record of transfer.

Neighbour Notification Record

Contact all neighbours to the property three days before baits are laid. Detail when and how you do this on **page 7** of this book.

Refer to *Directions for Use of 1080 for Wild Dog Control* to check what is required.

Five year 1080 Baiting Record

Enter details of baiting on **pages 8 – 10**. Complete each column, and look to the bottom of the page for examples of Actions and the detail needed for Bait locations.

Non-target animal deaths

Record any known or suspected deaths of non-target animals on **page 11**.

Wild dogs shot or trapped

If trapping and shooting of wild dogs is carried out on the property as an adjunct to 1080 baiting, complete **page 12**.

Accidents or incidents involving 1080 concentrate

1. If an accident with 1080 occurs, all work with the product must stop until the person or spill is attended to and made safe.
2. If exposed to 1080 concentrate (e.g. breathing in fumes, absorption through the skin, accidental injection) – the person should immediately receive urgent medical attention from a suitably qualified medical professional.
3. If poisoning occurs, call **000** to request an ambulance or other medical transport if feasible and **13 11 26** for Poison Information (a national 24 hour helpline).
4. Spillage of 1080 concentrate - follow the instructions and procedures described in the MSDS for the 1080 concentrate.
5. The Permit Holder must report any accidents with 1080 concentrate to NT WorkSafe on **1800 019 115** and the Chemicals Coordinator, and record the accident in the 1080 Property Baiting Record Books in the Baiting Operations Record **pages 8-10**.
6. Any misuse, theft or suspected theft of 1080 must be reported to the Chemicals Coordinator.

If you want further information or need another 1080 Property Baiting Record Book, please contact:

PURCHASE OR COLLECTION OF 1080 PRODUCTS

A PAMA and Permit Holder may collect the product themselves **OR** authorise a nominee to purchase and collect 1080 products from a reseller. If the latter, the PAMA and Permit Holder must provide a copy of the PAMA and Permit and, in writing, authorise the nominee with a signed and dated form to present to the reseller.

AUTHORISATION

I,.....(Name of PAMA & Permit holder)

authorise (Name of nominee)

to collect 1080 concentrate

from Licensed Reseller
(name and business name of Licenced Reseller)
